12 CLIMATE ACTION

13 LIFE ON LAND

14 INDUSTRY, INNOVATION AND INFRASTRUCTURE

15 PARTNERSHIPS FOR THE GOALS

16 PEACE, JUSTICE AND STRONG INSTITUTIONS

17 LIFE BELOW WATER

Introduction

Be the change foundation operates with the aim of empowering the society. BTCF looking for social development, which means **freedom, freedom from hunger, poverty, servitude, bondage, caste discrimination, ignorance, illiteracy, suicide, corruption and injustice and inflation**. BTCF can be a powerful way to bring about change. Be the change foundation mandate is to promote the public interest and serve the public good.

Our vision is empowerment of society through incorporating better innovative practices, modern technology and values. Our dream is to make the world better place and to catalyse a lasting, irreversible change for the good. BTC is a **not for profit foundation** which focuses on real-time and result oriented efforts. The BTCF team comprises of **100** highly qualified and experienced **professionals** who are committed to educational development and social transformation. It aims to provide the **extra mile benefit** to under privileged section.

Our Mission

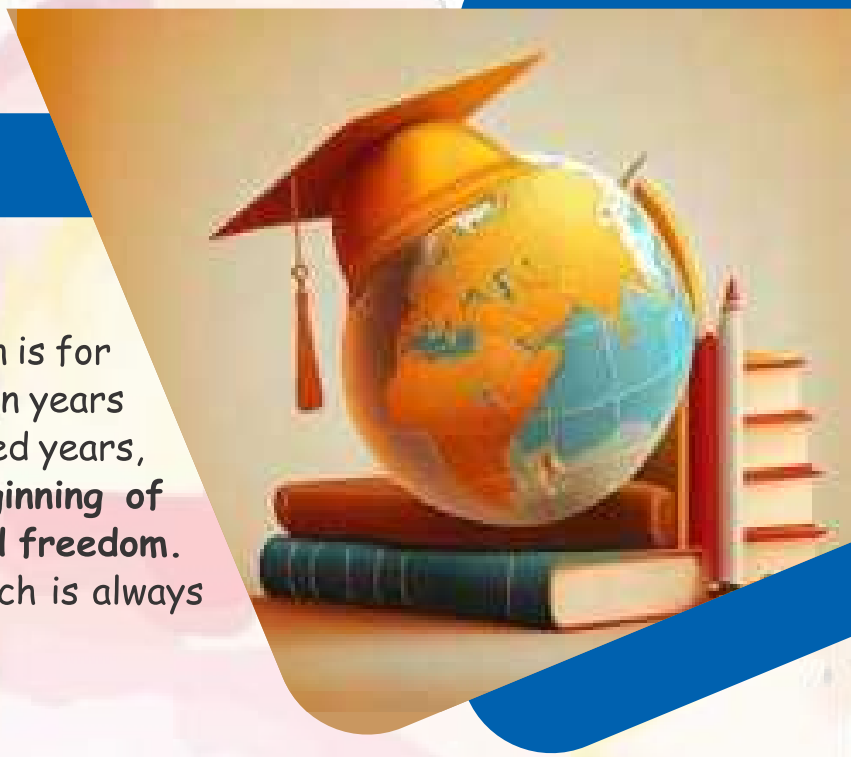

Be the change foundation advocate for health and educational awareness, conservation of environment, human rights and environmental protection, build youth leadership, promotion of culture, work to end violence against women and children, to build social awareness amoung the coming generations, to empower the youth, to promote organic farming, assist the poor and much more. **Respect, Integrity, Commitment** and **Excellence** is our core values.

Vision

Our strategy is to Engage, Empower, Execute and Exit: To engage rural communities with corporate, young urban India, not-for-profit organizations and governments and empower our communities to execute programs that transform their own lives, enabling us to exit and allowing them to serve as role models and change agents for the rest of the country.

We believe in a holistic, 360-degree development with a focus on eight key vertical: Education, Health, Environment, Culture, Social, Agriculture, Women Empowerment and Sport.

Education

Area of Work

Why Education

Once, **Confucius** said, "If your plan is for one year, plant rice. If your plan is for ten years plant trees. If your plan is for one hundred years, educate children." **Literacy is the beginning of access to such a world of knowledge and freedom.** Development is quantitative change, which is always positive.

Extent of the problem

The number of teachers has gone up substantially and the average **Pupil-Teacher Ratio** comes close to the required levels. However, this does not solve the problem of quality. Large number of teachers are not qualified to teach, yet they are teaching. According to a rough estimate, out of 8 million teachers, around 1.4 million fall in this category.

Our Approach

BTCF works for education for underprivileged children who are under difficult circumstances Special emphasis is given on girl education and women education, so that they and their families get empowered. BTCF goals to build pathways that bring student to school and ensure students learn at schools. Align with NEPS objective of developing 21st Century skills in adolescents. Strong Foundation initiative uses innovative and scalable solutions to help develop strong foundational learning skills like reading comprehension, writing ability, numeracy, and English speaking and critical abilities like self-expression, cognition, creativity, and gender sensitivity among children aged between 3-10 years living in the most marginalised geographies of India.

National Education Policy (NEP) 2020

NEP 2020 aims to increase the Gross Enrolment Ratio in higher education including vocational education from 26.3% (2018) to 50% by 2035. 3.5 Crore new seats will be added to Higher education institutions.

Health

Why Health

Time and health are two precious assets that we don't recognize and appreciate until they have been depleted. **Health is wealth**. Good health is the foundation of a thriving, progressive society. Health is important to live life to the fullest. When a person leads a healthy lifestyle, the body remains healthy and the mind is active and fresh. **Healthcare has become one of the largest sectors of the Indian economy**, in terms of both revenue and employment. Health is a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity.

Extent of the problem

Government's goal is to increase public health spending to **2.5% of GDP**. Current health spending is only 1.15-1.5% of GDP. USA Health Expenditure is 18% of GDP. Per Capita Budget Expenditure on Health in India is among the lowest in the world. Health sector expenditure rose by 73% in 2021-22. The government expenditure on the health sector increased by 73% to 4.72 lakh crore in 2021-22, as compared to 2.73 lakh crore in 2019-20. The WHO prescribes a Doctor- Population Ratio of one for every thousand, but India is lacking in this ratio.

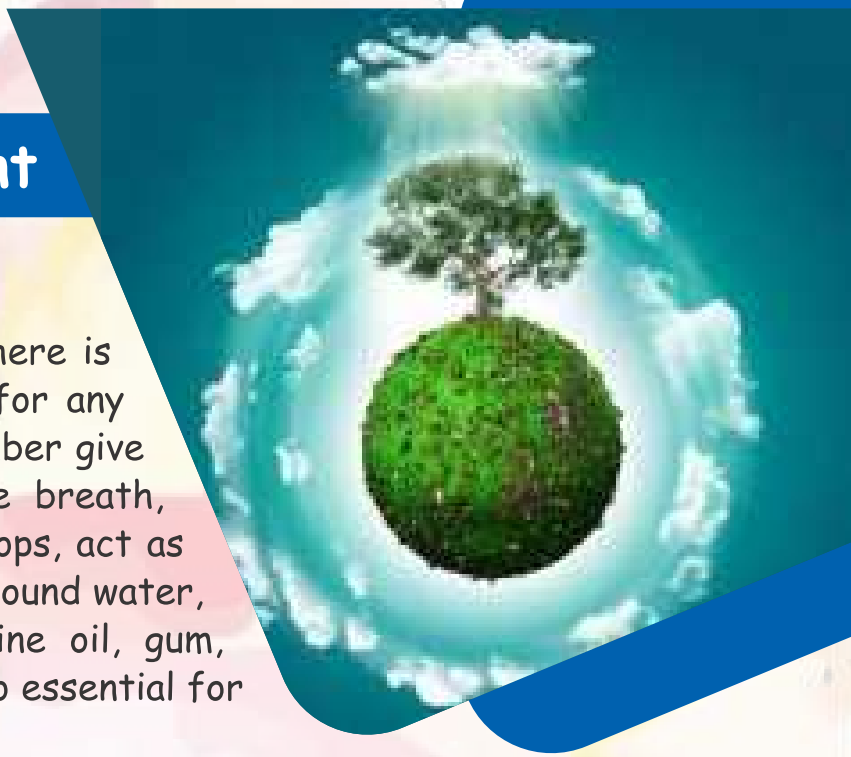

Our Approach

BTCF aims to support and strengthen the efforts of government and non-government systems to increase the efficiency of healthcare facilities. Spreading the awareness about the improving the Reproductive, Maternal, Newborn-Child and Adolescent Health among marginalised communities. Our mission is to alleviate poverty and encourage economic participation by empowering people through social and economic programs.

UNO on Health

1) Constitution of the **World Health Organization**

Environment

Why Environment

Once, **Mahatma Gandhi** said, "There is enough for everybody's need and not for any body's greed." Plant provide us with timber give shelter to animals produce oxygen we breath, protect soil so essential for growing crops, act as shelter belts, help in storage of underground water, gives use fruits, nuts, latex, turpentine oil, gum, medicinal plants and also paper that is so essential for your studies.

Extent of the problem

Earth has lost about 80 % of its native forests. **71%** earth is covered by water in which **68%** covered by sea and **3% on** land. Similarly, **29%** earth is covered by land. According to a recent **NITI Aayog report**, 21 Indian cities will run out of groundwater in coming years if usage continues at the current rate. The Sixth Assessment Report by **Intergovernmental Panel on Climate Change (IPCC)** on Global warming at 1.5c temp propagates the need to strengthen and enhance existing coping capacity. According to **World Bank** report due to Environment Degradation India faces loss of Rs. 3.75 trillion per year that is 5.7% of GDP.

Our Approach

Development is a need of the society but it should be from environment perspective, development needs to be climate-smart. **Development that meets the need of the present generation without compromising the ability of the future generation to meet their own needs**. Energy Access has to be Affordable, Reliable, Sustainable, Modern.

Regarding Environment, Who can issue order & instruction & direction in India

1) National Green Tribunal (NGT)
2) National Capital Region Planning Board (NCRPB)
3) Central Pollution Control Board (CPCB)

Culture

Why Culture

Culture is set of values, attitudes, orientation transmitted from a generation to the other generations. It is very important to Safeguarding the Indian Art Heritage because it gives us feeling of Identity. It reminds us our History. Many symbols like Ashokchakra create a feeling of integrity and unity in people of country. In the constitution of India under fundamental duties also says to protect Indian Heritage. Indian Heritage also provide many opportunities for tourism.

There are two type of Heritage

1) **Tangible Heritage**, this is type of heritage which can be touched. Example- Monuments.
2) **Non Tangible Heritage**, this is type of heritage which can't be touched. Example- Performing Arts, Dance.

Government steps to preserve Indian Art Heritage

1) PRASAD Scheme
2) Adopt a Monument Scheme
3) Swadesh Darshan Scheme
4) Ancient Monuments and Archaeological Sites and Remains Act of 1958
5) Ancient Monuments and Archaeological Sites and Remains (Amendment) Bill, 2017

Our Approach

BTCF promote preservation and promotion of art and culture.

UNO on Culture

United Nations Educational, Scientific and Cultural Organization (UNESCO)

Social

Why Social

Once, **Mahatma Gandhi** said, "Poverty is worst form of violence". When **84 %** of households in the country suffered a decline in their income in a year marked by tremendous loss of life and livelihoods, the number of Indian billionaires grew from 102 to 142, **Oxfam India's** latest briefing 'Inequality Kills' has revealed. In India **2%** wealth is kept by **50%** people. **India's 1% richest people have total 58% India's wealth**. Worlds 8 top people keep 50% of world's wealth. In India, inequality, poverty is reason of lack of focus on social indicator.

Extent of the problem

Amongst multiple factors affecting people's health in rural areas, sanitation and nutrition play a crucial role. According to **UNICEF**, 1.2 million children's died in India who are below 5 year & 40% among then died in 4 weeks. 5.9 million children died in **India, Congo, Ethiopia, Nigeria, Pakistan**. UNICEF said **India & Nigeria** is economically strong but not able to reduce no of death. Landlessness, Empowerment, Size of families, Illiteracy, Poor Health/ Malnutrition, Child Labour, Helplessness, Inflation, Saturation are the Poverty Issues in India.

Our Approach

BTCF is working with and for communities to foster healthy lifestyles and improve access to good health in rural areas. **Development may be possible without growth but growth is not possible without development**. Development is freedom which is often associated with modernization, leisure, computerization, industrialization, efficient transport& communication network large education system.

Society Based Reports

1) Global Childhood Report Released by Save the Children
2) Oxfam India
3) World Population Prospects

Agriculture

Why Agriculture

Once, **Mahatma Gandhi** said, "The future will belong to nations with grains, not guns." In India, Agriculture is biggest unorganized sector where **48.9%** population depends in India. In the year 2002, Agriculture is announced as **PMF (Prime Moving Force).1%** land in agriculture leads **0.5 %** increases in industrial output and **0.7 %** increases in National income of India. According to recent **NABARD Survey**, an average monthly income of one rural household is 8059 rupee, from which **43%** income comes from agriculture and another **57%** income comes from daily labor work or government job. Means rather than farming, government need to provide another sources to farmers to increase income level.

Extent of the problem

Irrigation/ water management is also major problem in India as more than **60%** of irrigation water is consumed by two crops: **Rice** and **Sugar Cane**. India uses up to three times the water used to produce one tonne of grain in countries such as **Brazil, China**. In fact, **agriculture productivity in India is amongst the lowest in the world**. Land degradation and unsustainable agriculture practices have led to a loss of productivity which is fueling rural poverty. While farmers in irrigated areas earn 60 percent of their income from agriculture, farmers in rainfed areas earn only 20-30 per cent from farm-related activities. **Farm distress**, **agrarian distress** are the major agrarian projects in India.

Our Approach

Everything else can wait but agriculture cannot. It is time for a New India. **BTCF**aims to promote the awareness about Modern Irrigation Facilities. Also promote the need of **Seeds and Scientific and Modern Technological** knowledge that can help and guide in Reducing Costs. **BTCF**will help farmers to understanding a Rapid Transition to Cost-Effective **Organic Farming**.

Women Empowerment

Why Women Empowerment?

Once, **B R Ambedkar** said, "I measure the progress of a community by the degree of progress which women have achieved." In India, women form **50%** of population, do **70%** of work hours, earn **10%** of salary and won 1% of property. **Gender equality** remains a burning issue even when women play equally important roles in driving the rural economy in India. **When we invest in women and girls, we invest in strengthening their families and communities**.

Extent of the problem

Women movement is a movement which demands **equal legal, economic & social rights** for women. Women have always been facing the inequitable distribution of domestic chores besides other responsibilities such as fetching water, collecting firewood and even working in the farms. This is severely impacting their physical security, opportunities for adult education, overall productivity, and overall health and well-being.

Our Approach

BTCF focuses on large scale interventions that build communities that are capable of empowering women and girls. **BTCF** aims to provide women with access to economic opportunities and enable their participation in decision-making, so that they become equal partners in the development process. **BTCF** looking for the freedom for womens, the freedom in the real sense of term is, possible only with the empowerment & participation of people in exercise of their capabilities of choice in society.

UNO on Women Empowerment

1) UN Women founded in July 2010 is a United Nations entity working for gender equality and the empowerment of women
2) Sustainable Development Goal 5: Gender Equality
3) Convention on the Elimination of All Forms of Discrimination Against Women.

Sport

Why Sport

In India sport is a part of the culture since ancient time. It contains lots of sports like **football, kho-kho, cricket, shooting, wresting**. Sport has ability maintain the physical as well as mentalhealth of youth. However, they also encourage healthy decision-making such as not smoking and not drinking.

Extent of the problem

There is a high level of complexity in the Indian sport sector as diverse organizations are responsible for delivering and managing sport in India. India is a diverse sport country from the ancient times like the kabbadi in Maharashtra but there is a not promotion of sports at grassroot level. Not all the sports are encouraged in India like Cricket is the only dominated game in urban as well as rural areas. There is a huge need of reviving the sports culture in India.

Our Approach

BTCFaims to identifies socially and economically backward communities with an inherent inclination, attributes or interest in athletics. The overall objective is to uplift the lives of young people from the marginalized communities and promote grassroot games.

Government stakeholders of Sports Governance in India

1) Ministry of Youth Affairs and Sports (MYAS)
2) Indian Olympic Association (IOA)
3) State Olympic Association (SOA),
4) National Sports Federation (NSF),
5) Sports Authority of India (SAI)

Recent Government Initiatives to Promote Sports Culture?

President View

Mayur Dhokchaule
President

Mayur Dhokchaule is a dynamic social entrepreneur, educational consultant, and visionary leader who founded Be The Change Foundation on 28th April 2022, with a strong commitment to driving social transformation through education, innovation, and value-based initiatives. A passionate advocate for societal upliftment, Mr. Dhokchaule's journey toward founding Be The Change Foundation was deeply influenced by his four-year stay in the Indian capital, New Delhi, where he immersed himself in the heart of social issues and grassroots activism. This period ignited his passion for community service and inspired his mission to create meaningful impact at scale.

With a strong academic and professional background in the education sector, Mr. Dhokchaule has served as a Principal for over five years in prestigious CBSE-affiliated English medium schools and NDA (National Defence Academy) preparatory academies. He is also the founder of ScaleZen Technologies Private Limited, a leading educational consultancy firm that has been instrumental in designing and delivering innovative academic solutions across India.

Under his leadership, Be The Change Foundation (BTCF) aims to empower society by addressing core social challenges such as poverty, hunger, illiteracy, caste discrimination, unemployment, corruption, and injustice. BTCF envisions a world where freedom from servitude, ignorance, and inequality is not a privilege but a right for all.

Mr. Dhokchaule's approach combines modern technology, sustainable practices, and ethical governance to create scalable solutions in education and community development. His vision is to build a socially conscious ecosystem that fosters empowerment through knowledge, skills, and moral responsibility.

BTCF operates with a strong mandate to promote public interest and serve the common good, aligning with the global Sustainable Development Goals (SDGs). Under his guidance, the foundation is creating grassroots impact while simultaneously inspiring youth and citizens to become active participants in social change.
